

- Are you a Student- or know one? 10 complimentary spaces available for this workshop. Contact info@cobwa.com.au
- Those who are attending are welcome to bring their own soil sample for analysis, what a bonus!
- The event is fully catered [dietary needs other than Gluten Free and or Vegan to be advised i.e. allergies]

You're invited to: Tech Tooling Soil and Plant Health Training with Graeme Sait

Improving the health of your soil is essential to increasing your output, but how can you tell if you are making progress? COBWA in association with Agrifutures Australia invite you to a day of instruction into available, portable and affordable soil and plant health technologies.

Internationally respected author, educator, & farmer, Graeme Sait (CEO, Nutri-Tech Solutions www.nutri-tech.com.au), will conduct a workshop & field walk on 14th of Oct at the Jarvis family farm [Prime Organics].

Participants will view and get familiarity on the use of many handheld soil and plant monitoring technologies including the bacteria to fungi ratio MicroBIOMETER® plus Plant Sap Calcium/ Potassium/ Nitrate/ Conductivity/ Meters and Brix refractometers.

Research shows that microbial biomass (fungi and bacteria) is the leading indicator of soil health. Living soil fixes nutrients, improves plant immunity, stores water more efficiently and builds soil structure. Therefore, a healthy level of soil and plant function increases productivity while reducing inputs.

This day is designed to introduce simple user-friendly technology to help you monitor plant and soil factors that aid your awareness and decision making needs.

\$30 for members

\$60 for non-members

Date: Friday 14th of Oct

Time: 9am - 3pm

Location: Jarvis Family Farm, 206 Goldfields Road, Upper Capel, WA, 6239
